

FINAL PROJECT PRESENTATION

# School Administration Management System

Presented by **Rohit Raj** · ERP:- **RU-25-11206**

SESSION:- **2025-2026**      SUBJECT CODE:- **RU-100-00012**

Under the Guidance of :- **Mr. Shantanu Sasmal**

# Introduction

Schools today manage vast amounts of student, staff, and academic data — often through manual, error-prone processes. The **School Administration Management System (SAMS)** is a digital platform designed to centralize and automate these operations, reducing paperwork, minimizing errors, and improving communication between administrators, teachers, students, and parents.

## The Problem

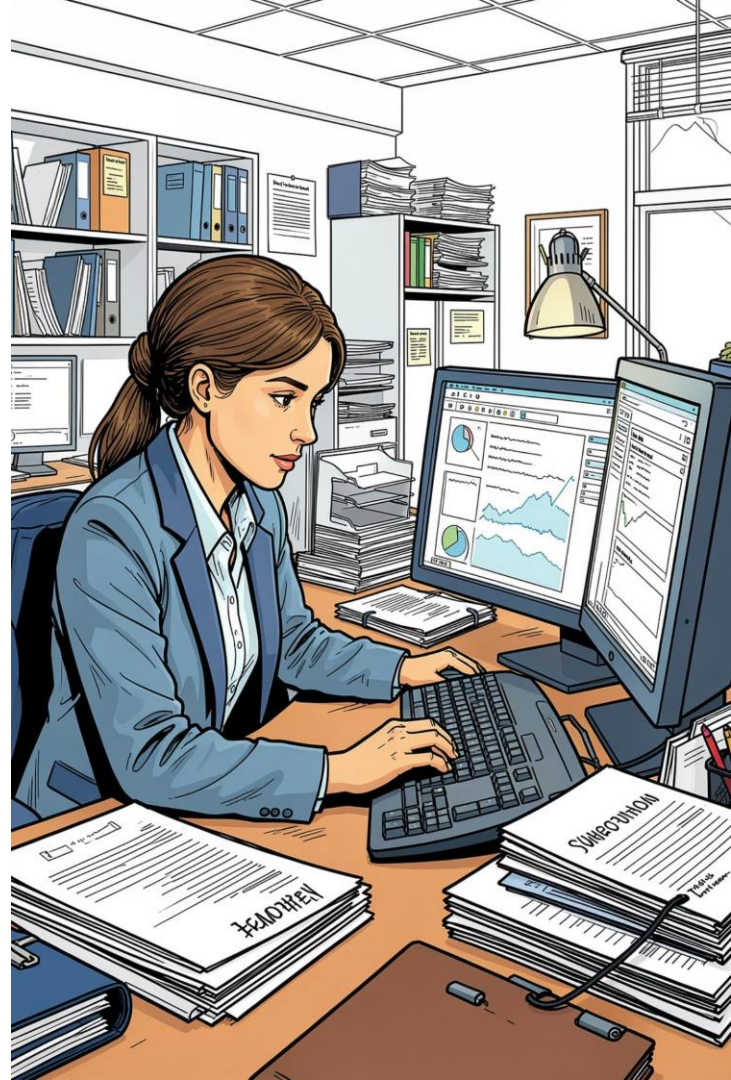

Fragmented records, slow communication, and time-consuming manual processes hinder school efficiency.

## The Solution

A unified, role-based ERP system that digitizes admissions, attendance, timetables, and reporting.

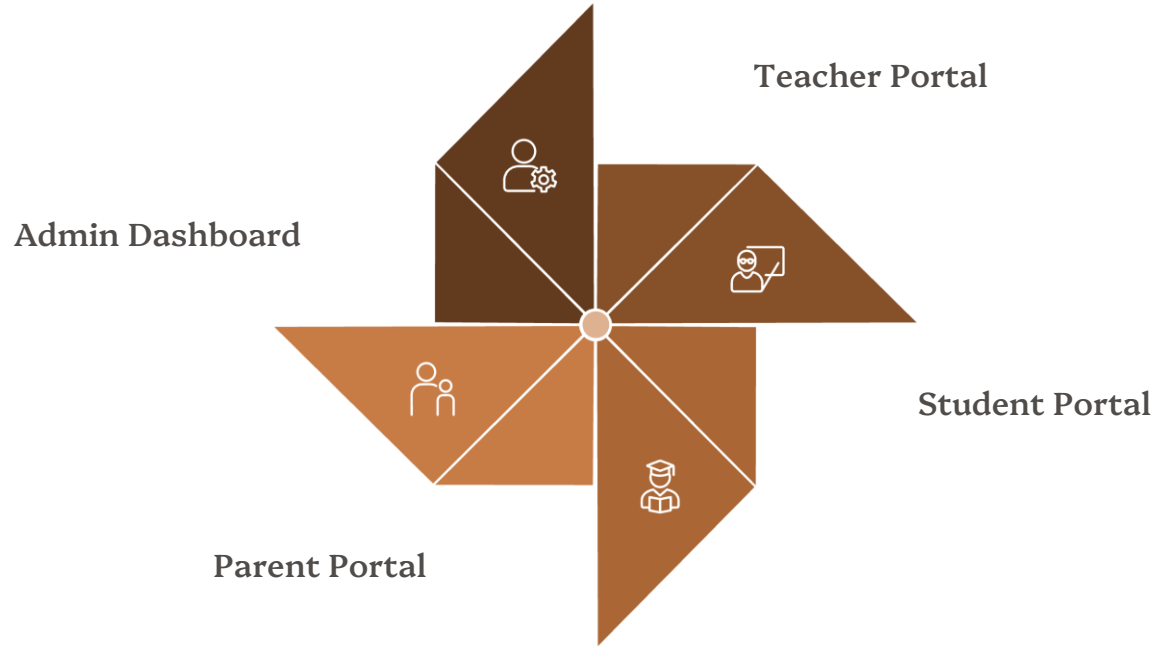

## The Goal

Empower schools to operate smarter, faster, and with greater transparency for all stakeholders.

# Working of the Project

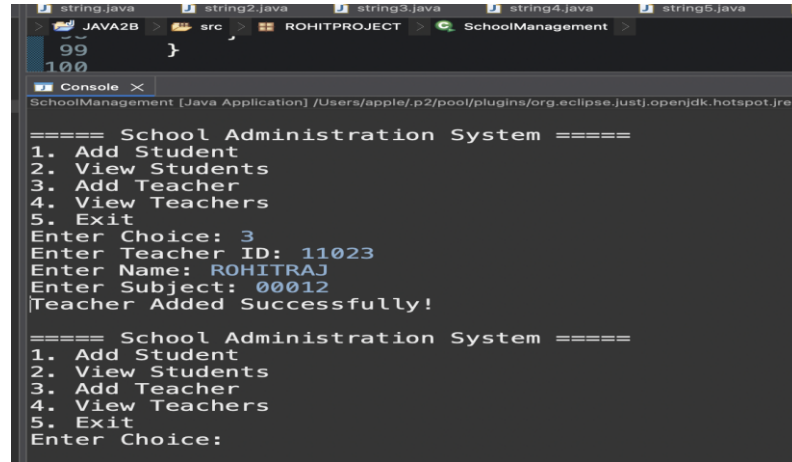

SAMS is built around four core modules, each serving a distinct group of users. The system follows a secure, role-based access model to ensure data integrity and privacy.

Each module communicates with a central database, ensuring real-time updates across all user roles. The system is built using standard web technologies with a clean, intuitive interface designed for users with minimal technical background.

# Project Screenshots

The following screenshots illustrate the key interfaces and features implemented within the School Administration Management System.

## Admin Dashboard

Centralized overview of student enrollment, staff records, and system settings.

## Attendance Module

Teachers can mark and monitor daily attendance with instant parent notifications.

## Results & Reports

Automated grade calculation and downloadable report cards for students and parents.

# Conclusion & Future Scope

## Key Takeaways

SAMS successfully demonstrates how a well-structured digital system can transform school administration — reducing manual effort, improving accuracy, and fostering better stakeholder engagement.

- Streamlined administrative workflows
- Role-based secure access for all users
- Real-time data visibility and reporting

## Future Enhancements

- **Mobile Application** — Extend access via a dedicated Android/iOS app for on-the-go management.
- **AI-Powered Analytics** — Introduce predictive insights on student performance and attendance trends.
- **Cloud Deployment** — Migrate to a cloud-hosted architecture for scalability and remote access.

**Thank You**
